Aarav Mehta
aarav.mehta@example.com | +91 98xxxxxx10 | github.com/aaravm | linkedin.com/in/aaravm
Bengaluru, India

EDUCATION
B.Tech in Electronics and Communication Engineering, XYZ Institute of Technology 2022 – 2026
CGPA: 8.4/10
Relevant coursework: Digital Image Processing, Linear Algebra, Probability and Statistics, Data Structures

PROJECTS
Lane Detection for Indian Roads | Python, OpenCV Jan 2025 – Mar 2025
- Built a classical lane detection pipeline using Canny edges and Hough transforms on 2,000 dashcam frames.
- Reduced false detections by 18% using region-of-interest masking and temporal smoothing.
- Code and demo: github.com/aaravm/lane-detect

Handwritten Digit Classifier
- Trained a small CNN in Keras on MNIST reaching 98.9% test accuracy.
- Wrote a Flask endpoint to serve predictions from the trained model.

Campus Attendance Dashboard
- Created a web dashboard with HTML, CSS and JavaScript to visualize attendance data pulled from a MySQL database.

EXPERIENCE
Research Intern, Signal Processing Lab, XYZ Institute May 2024 – Jul 2024
- Implemented image denoising filters in MATLAB and compared them with NumPy implementations.
- Wrote weekly reports and presented findings to the lab group.

TECHNICAL SKILLS
Languages: Python, C, MATLAB, SQL
Libraries: OpenCV, NumPy, Pandas, Matplotlib, PyTorch (basic)
Tools: Git, Linux, Jupyter

ACHIEVEMENTS
- Finalist, Smart India Hackathon 2024 (team of 6) – built a crop disease detector prototype.
